

2021 UPDATE: WATER AND WASTEWATER CHARGES

NEW Construction Water Charges

Effective January 1, 2021, Oxford County will charge for water use during construction

Oxford County Council approved changes to the County's Water and Wastewater Rates by-law on November 12, 2020.

As part of this By-law the County will now be charging for water use during construction, effective January 1, 2021.

The charge for construction water will be based upon the lateral pipe size leading to the property, and include an assumption of 15m³ of consumption per month.

Construction water charges will begin after an approved property line inspection. Once the property has a water meter and ERT installed, the charges will be changed to the metered charges for water and wastewater.

This charge will be effective for all properties under construction whose property line inspection occurs after January 1, 2021.
